

Sports Medicine Physician - Sydney Adventist Hospital, NSW

An excellent opportunity has arisen for a Sports Medicine Physician to join Sydney Adventist Hospital, the largest private hospital in NSW. Sydney Adventist Hospital is a teaching hospital of the University of Sydney and offers excellent facilities, a full range of medical specialties and diagnostic services, a busy emergency care department, and an integrated cancer centre. This is an excellent place to work with an unmatched record and reputation in our community and it's the right time to join following our redevelopment which provided an extra 200 beds and facilities to meet the increased demand for our services. A new consulting suite development at Parkway San Clinic provides a great opportunity to develop a new Sports Medicine service onsite.

A Sports Physician would have a unique opportunity to be the first onsite provider and is likely to receive referrals from a wide range of sources i.e. GP referral, specialist and allied health referrals. We have a busy orthopaedic department with 4000 inpatient admissions per year, of which 17% are non-elective via the emergency department. San Radiology has specialised musculoskeletal radiologists and we have outpatient physiotherapy services including Sports Physiotherapy. Acute and chronic pain services are onsite. Our emergency department sees around 20,000 presentations per year and more than 130 specialists consult onsite, including a general practice. Our oncology services have a strong wellness focus and include exercise physiology classes in a purpose built gym. Our rehabilitation service includes 47 inpatient beds, full rehabilitation gym and hydrotherapy pool. A separate cardiac rehabilitation service has another purpose built gym and exercise physiology. A number of elite private schools are within our catchment centre along with some elite sports groups, sports teams and many businesses' providing an excellent opportunity to build a thriving practice. The sports physician can work with existing specialists, emergency physicians, physiotherapists and other allied health to make the service a preferred choice for sports medicine in the local community.
